Tire Science and Technology
Index to Volume 31
2003

Number	Months	Pages
1	Jan.-Mar.	1-66
2	Apr.-Jun.	67-130
3	Jul.-Sep.	131-202
4	Oct.-Dec.	203-276

A

ABAQUS
Tread Discontinuities as Source of Vibration/Noise-Transient Dynamics of Rolling Tire, Oct.-Dec., 204
ATV
Obstacle Impact Simulation of an ATV Using an Efficient Tire Model, Oct.-Dec., 248

B

Braking
Transient Finite Element Analysis of Tire Dynamic Behavior, April-June, 104

C

Camber
Transient Finite Element Analysis of Tire Dynamic Behavior, April-June, 104
Commercial-vehicle tires
Lateral-Acceleration Experience of Six Commercial Vehicles, April-June, 87
Computer aided engineering
Surface Shape Optimization of Tire Pattern by Optimality Criteria, Jan.-Mar., 2
Constitutive equation
Thermomechanics of Elastomers Undergoing Scission and Crosslinking at High Temperatures, April-June, 68
Contact patch
Evaluation of Tire Tread and Body Interactions in the Contact Patch, July-Sept., 159
Contact pressure
Surface Shape Optimization of Tire Pattern by Optimality Criteria, Jan.-Mar., 2
Cornering
Transient Finite Element Analysis of Tire Dynamic Behavior, April-June, 104
Crosslinking
Thermomechanics of Elastomers Undergoing Scission and Crosslinking at High Temperatures, April-June, 68

D

Discontinuity
Tread Discontinuities as Source of Vibration/Noise-Transient Dynamics of Rolling Tire, Oct.-Dec., 204
Durability simulation
Obstacle Impact Simulation of an ATV Using an Efficient Tire Model, Oct.-Dec., 248
Dynamic loads
Obstacle Impact Simulation of an ATV Using an Efficient Tire Model, Oct.-Dec., 248

C

Camber
Transient Finite Element Analysis of Tire Dynamic Behavior, April-June, 104
Commercial-vehicle tires
Lateral-Acceleration Experience of Six Commercial Vehicles, April-June, 87
Computer aided engineering
Surface Shape Optimization of Tire Pattern by Optimality Criteria, Jan.-Mar., 2
Constitutive equation
Thermomechanics of Elastomers Undergoing Scission and Crosslinking at High Temperatures, April-June, 68
Contact patch
Evaluation of Tire Tread and Body Interactions in the Contact Patch, July-Sept., 159
Contact pressure
Surface Shape Optimization of Tire Pattern by Optimality Criteria, Jan.-Mar., 2
Cornering
Transient Finite Element Analysis of Tire Dynamic Behavior, April-June, 104
Crosslinking
Thermomechanics of Elastomers Undergoing Scission and Crosslinking at High Temperatures, April-June, 68

D

Discontinuity
Tread Discontinuities as Source of Vibration/Noise-Transient Dynamics of Rolling Tire, Oct.-Dec., 204
Durability simulation
Obstacle Impact Simulation of an ATV Using an Efficient Tire Model, Oct.-Dec., 248
Dynamic loads
Obstacle Impact Simulation of an ATV Using an Efficient Tire Model, Oct.-Dec., 248

E

Efficient tire model
  Obstacle Impact Simulation of an ATV Using an Efficient Tire Model, Oct.-Dec., 248
Evolutionary optimization
  Application of a Shell-Spring Model for the Optimization of Radial Tire Contour Using a Genetic Algorithm, Jan.-Mar., 39
Explicit finite element
  Road Load Analysis, Jan. - Mar., 19
Explicit transient dynamics
  Tread Discontinuities as Source of Vibration/Noise-Transient Dynamics of Rolling Tire, Oct.-Dec., 204

F

FEM
  Prediction of Snow/Tire Interaction Using Explicit FEM and FVM, July-Sept., 173
Finite element analysis
  BAT Model Lateral Parameters Characterization Using Finite Element Model, Oct.-Dec., 225
Finite element method
  Surface Shape Optimization of Tire Pattern by Optimality Criteria, Jan. - Mar., 2
Application of a Shell-Spring Model for the Optimization of Radial Tire Contour Using a Genetic Algorithm, Jan.-Mar., 39
Prediction of Tire Tread Wear with FEM Steady State Rolling Contact Simulation, July-Sept., 189
Finite modeling software
  Evaluation of Tire Tread and Body Interactions in the Contact Patch, July-Sept., 159
Free-end displacement
  Simplified Approach to Calculating Geometric Stiffness Properties of Tread Pattern Elements, July-Sept., 132
FVM
  Prediction of Snow/Tire Interaction Using Explicit FEM and FVM, July-Sept., 173

G

Genetic algorithm
  Application of a Shell-Spring Model for the Optimization of Radial Tire Contour Using a Genetic Algorithm, Jan.-Mar., 39
Groove
  Tread Discontinuities as Source of Vibration/Noise-Transient Dynamics of Rolling Tire, Oct.-Dec., 204

I

Impact
  Road Load Analysis, Jan. - Mar., 19
Impact simulation
  Obstacle Impact Simulation of an ATV Using an Efficient Tire Model, Oct.-Dec., 248

K

Kao, B.G., and Warholic, T.: BAT Model Lateral Parameters Characterization Using Finite Element Model, Oct.-Dec., 225

Koehne, S.H., Matute, B., and Mundl, R.: Evaluation of Tire Tread and Body Interactions in the Contact Patch, July-Sept., 159

L

Lateral acceleration
  Lateral-Acceleration Experience of Six Commercial Vehicles, April-June, 87

Liu, H.: Tread Discontinuities as Source of Vibration/Noise Transient Dynamics of Rolling Tire, Oct.-Dec., 204

Load
  Lateral-Acceleration Experience of Six Commercial Vehicles, April-June, 87

M

Magic formula
  Transient Finite Element Analysis of Tire Dynamic Behavior, April-June, 104

Mass
  Lateral-Acceleration Experience of Six Commercial Vehicles, April-June, 87

Mousseau, R., and Markale, G.: Obstacle Impact Simulation of an ATV Using an Efficient Tire Model, Oct.-Dec., 248

Multi-network theory
  Thermomechanics of Elastomers Undergoing Scission and Crosslinking at High Temperatures, April-June, 68

N

Nakajima, Y., Takahashi, F., and Abe, A.: Surface Shape Optimization of Tire Pattern by Optimality Criteria, Jan.-Mar., 2

Noise
  Tread Discontinuities as Source of Vibration/Noise-Transient Dynamics of Rolling Tire, Oct.-Dec., 204

Non-linear finite element analysis
  Transient Finite Element Analysis of Tire Dynamic Behavior, April-June, 104

O

Okonieski, R.E., Moseley, D.J, and Cai, K.Y.: Simplified Approach to Calculating Geometric Stiffness Properties of Tread Pattern Elements, July-Sept., 132

Optimality criteria
  Surface Shape Optimization of Tire Pattern by Optimality Criteria, Jan.-Mar., 2

Optimization technique
  Surface Shape Optimization of Tire Pattern by Optimality Criteria, Jan. - Mar., 2

P

Parallel-end displacement
Simplified Approach to Calculating Geometric Stiffness Properties of Tread Pattern Elements, July-Sept., 132
Path curvature
Lateral-Acceleration Experience of Six Commercial Vehicles, April-June, 87
Principal stiffness
Simplified Approach to Calculating Geometric Stiffness Properties of Tread Pattern Elements, July-Sept., 132

R

Radial tire
Application of a Shell-Spring Model for the Optimization of Radial Tire Contour Using a Genetic Algorithm, Jan.-Mar., 39
Rao, K., Kumar, R., and Bohara, P.: Transient Finite Element Analysis of Tire Dynamic Behavior, April-June, 104
Rolling
Tread Discontinuities as Source of Vibration/Noise-Transient Dynamics of Rolling Tire, Oct.-Dec., 204

S

Scission
Thermomechanics of Elastomers Undergoing Scission and Crosslinking at High Temperatures, April-June, 68
Seta, E., Kamegawa, T., and Nakajima, Y.: Prediction of Snow/Tire Interaction Using Explicit FEM and FVM, July-Sept., 173
Shell-spring model
Application of a Shell-Spring Model for the Optimization of Radial Tire Contour Using a Genetic Algorithm, Jan.-Mar., 39
Simplified numerical approach
Simplified Approach to Calculating Geometric Stiffness Properties of Tread Pattern Elements, July-Sept., 132
Simulation
Transient Finite Element Analysis of Tire Dynamic Behavior, April-June, 104
Snow
Prediction of Snow/Tire Interaction Using Explicit FEM and FVM, July-Sept., 173
Sobhanie, M.
Road Load Analysis, Jan.-Mar., 19
Speed
Lateral-Acceleration Experience of Six Commercial Vehicles, April-June, 87
Steady state rolling simulation
Prediction of Tire Tread Wear with FEM Steady State Rolling Contact Simulation, July-Sept., 189

T

Tire
Surface Shape Optimization of Tire Pattern by Optimality Criteria, Jan.-Mar., 2

Prediction of Snow/Tire Interaction Using Explicit FEM and FVM, July-Sept., 173
Transient Finite Element Analysis of Tire Dynamic Behavior, April-June, 104
Tread Discontinuities as Source of Vibration/Noise-Transient Dynamics of Rolling Tire, Oct.-Dec., 204
Tire modeling
BAT Model Lateral Parameters Characterization Using Finite Element Model, Oct.-Dec., 225
Tire modes
BAT Model Lateral Parameters Characterization Using Finite Element Model, Oct.-Dec., 225
Tire simulation
Obstacle Impact Simulation of an ATV Using an Efficient Tire Model, Oct.-Dec., 248
Tire tread
Evaluation of Tire Tread and Body Interactions in the Contact Patch, July-Sept., 159
Tire vibrations
BAT Model Lateral Parameters Characterization Using Finite Element Model, Oct.-Dec., 225
Traction
Prediction of Snow/Tire Interaction Using Explicit FEM and FVM, July-Sept., 173
Transient dynamic
Road Load Analysis, Jan.-Mar., 19
Tread
Tread Discontinuities as Source of Vibration/Noise-Transient Dynamics of Rolling Tire, Oct.-Dec., 204
Tread block stiffness
Simplified Approach to Calculating Geometric Stiffness Properties of Tread Pattern Elements, July-Sept., 132
Tread design
Evaluation of Tire Tread and Body Interactions in the Contact Patch, July-Sept., 159
Tread engineering properties
Simplified Approach to Calculating Geometric Stiffness Properties of Tread Pattern Elements, July-Sept., 132
Tread pattern
Evaluation of Tire Tread and Body Interactions in the Contact Patch, July-Sept., 159
Tread wear
Prediction of Tire Tread Wear with FEM Steady State Rolling Contact Simulation, July-Sept., 189
Turn radius
Lateral-Acceleration Experience of Six Commercial Vehicles, April-June, 87

U

Unnithan, G., KrishnaKumar, R., and Prasad, A.: Application of a Shell-Spring Model for the Optimization of Radial Tire Contour Using a Genetic Algorithm, Jan.-Mar., 39

V

Vibration
Tread Discontinuities as Source of Vibration/Noise-Transient Dynamics of Rolling Tire, Oct.-Dec., 204

W

Wineman, A., Jones, A., and Shaw, A.: Thermomechanics of Elastomers Undergoing Scission and Crosslinking at High Temperatures, April-June, 68
